- Working as Web Developer since 2013;
- 3+ years of experience as a team leader;
- Agile practitioner since 2015;
- Teached over 100+ developers Typescript, React and Angular from scratch;
- Contributed to numerous projects for big companies with focus on accessibility and performance;
- Enthusiastic about continuous learning and sharing knowledge through talks, articles, and videos;
- Multiple experiences working with/founding startups;

Languages & Libraries	Front-end	Back-end
JavaScript (pro)	React (pro)	Node.js (Express, Koa, Nest) (good)
TypeScript (pro)	Angular (pro)	WordPress (pro)
RxJS (pro)	Vue (good)	MySQL (basic)
PHP (good)	Unit testing (Jest) (good)	MongoDB (basic)
CSS (SASS, PostCSS) (pro)		

🗣️ **Spoken languages:** 🇮🇹 Italian (Native), 🇬🇧 English (Professional)

Core experiences

Senior front-end teacher and consultant

[Sentiero.digital](#) – *(Feb 2022 - **today**)*

I was involved in various projects/courses, including:
- Instructed 4 entry-level JavaScript & React courses;
- Designed an advanced Angular course focusing on TypeScript and unit testing (Jest);
- Developed a React, TypeScript, and Styled Components component library for a banking project;
- Led a 4-member team in constructing a sophisticated data dashboard for an enterprise;
- Built a travel-oriented single-page application with Angular, TypeScript, and RxJS;
- Crafted several e-commerce front-end using React, Next.js/Remix, and TypeScript;
- Customized WordPress themes and plugins, including external app integration.

Co-Founder & Lead Web Developer

[The Wave Studio](#) – *(Gen 2019 - Feb 2022)*

I co-founded The Wave Studio in 2019, where I held a dual role as both a product developer and the manager of the web department overseeing 10+ developers. Specifically, I operate on high-impact agency projects, taking charge when the technical challenge demands strong execution, in-depth development knowledge, and collaboration across various roles.

My responsibilities include continuous research and development, exploring new languages, patterns, CMS, and libraries for implementation within the company. I coordinate and manage the web team and multiple micro-teams concurrently across various projects. I provide technical support, conduct code reviews across the agency's diverse stacks, oversee team training, manage hiring budgets, and conduct technical interviews.

Tech stack: **[JavaScript, TypeScript, RxJs, Angular, Vue, React, PHP, WordPress, Node.js]**

Other experiences
